

Varner chemical requirements and Restricted Substances List

Legal compliance

A product produced for Varner shall always comply with all directives, regulations, laws and standards applicable to the product and the market where it is sold. Therefore, we expect all suppliers to be well informed on the legal requirement for Europe when trading with Varner brands. Compliance to REACH and the Product Safety Directive, together with product specific directives/regulations, and Varner Restricted Substances List are regarded as an inevitable part of knowledge when supplying goods to Varner. All suppliers must fill out, sign, and return the Chemical Self-Assessment before supplier approval, see Appendix 5.

Quality Assurance & Control

We expect all suppliers to have implemented a proper quality management system in all parts of their production. These shall always be written down and available upon request.

Varner Restricted Substances List (RSL)

The way we work

The list of restricted substances shows restricted substances and the maximum concentration. It applies to all our suppliers, their manufacturing units, and their sub-contractors. All suppliers of raw materials, ginning mills, spinning mills, knitting, and weaving mills, laundries, tanneries, dye houses, printing facilities or garment factories must follow our requirements. The RSL also includes requirements for packaging. As a supplier, you have the responsibility to pass downstream these requirements.

All orders for Varner must comply with all requirements in the RSL. Please note, unless otherwise is stipulated in the RSL, all suppliers are required to follow the EU regulatory framework for Chemicals. In addition to the RSL, you also need to fulfil the requirement stated in the chapter Chemical Handling.

Sanctions for violation of chemical requirements as listed in the Supplier manual's Restricted Substances List and procedures: In case of claims Varner has the right to be fully compensated for financial losses and expenses due to a non-delivery clause with our final customers.

Chemical Testing

A test report performed by a Varner nominated laboratory may be requested. Supplier must also follow the test programs for the different product groups. Workflow for testing you will find described in the test program in Appendix 6.

Varner reserves the right to cancel orders, in complete or in part, and claim or take other action if products or tests do not comply with our chemical requirements. The buying department reserves the right to ask for additional documentation showing the requirements have been respected and random controls may be carried.

A list of Varner nominated labs you will find in Appendix 7.

Chemical testing might be exempted in special cases, if the supplier holds a full certification of Step, Oekotex, Nordic Ecolabel, Cradle to Cradle (Silver or above) or similar. Please contact Varner Quality Assurance Specialist for information, requirements, and procedure.

General Requirements for all materials

REACH (Registration, Evaluation, Authorization and restriction of Chemicals)

SVHC (Substance of Very High Concern) Products produced for Varner cannot contain more than 1000 mg/ kg of substances on the SVHC list. If substances are stated both in the Varner RSL and in the SVHC list, the Varner RSL requirements should be followed.

PBT, vPvB, CMR or ED

Substances defined as persistent, bio accumulative and toxic (**PBT**), very persistent and very bio accumulative (**vPvB**), carcinogenic, mutagenic and toxic for reproduction (**CMR**), endocrine disruptors (**ED**) or equivalent concern but not yet regulated and specified in the RSL, cannot exceed 1000 mg/kg in a product. If a specific substance is stated both in Varner RSL and as PBT, vPvB, CMR or ED, the Varner requirements must be followed.

Highlighted Bans

Biocides including all antibacterial treatments on finished products are banned by Varner.

All **fluoro chemicals** in production are banned.

Mold Spores and mycelia of mold cannot be detected.

PVC is banned.

Flame retardants are banned.

If any questions, contact sustainability@varner.com

Legal background

REACH

As a Varner supplier, you are required to comply with the European Chemicals legislation called REACH that is in force since 1st of June 2007. REACH is an abbreviation for **Registration, Evaluation, Authorisation and restrictions of Chemicals**.

The essence of REACH is to ensure a high level of safety for human health and environment, focused on substances in general and hazardous substances in particular, that are manufactured in EU, imported into EU and used within EU. It is the responsibility of all manufacturers, importers, and users of substances within EU to ensure that the substances they manufacture, import or use do not pose any risk to human health and environment.

REACH affects all EU-actors that professionally manufacture, import, sell, buy, distribute, or use chemicals as such and in articles.

Varner require that all our suppliers are prepared for REACH and that you follow updated information on the website of the European Chemicals Agency (ECHA), <http://ECHA.europa.eu> that is the European Authority for REACH on behalf of the European Commission.

Registration

One of the requirements of REACH is that manufacturers of chemicals and importers of chemicals and articles have a duty to register substances. For importers of articles registration requirements apply to substances intentionally released from articles.

Duty to inform your customer on substances for authorization

Since 28th of October 2008 all EU-actors that professionally manufacture, import, sell or distribute articles are legally obliged to inform their customer about the presence of Substances of Very high Concern (SVHC), (also called candidate substances) in articles they sell.

To find the latest list of SVHC we ask you to read this on ECHA:s website, <https://echa.europa.eu/web/guest/candidate-list-table>

It is your responsibility as a supplier to keep updated on the Candidate list of authorization, annex XIV of authorization substances and annex XVII of restricted substances.

You are not allowed to use any substances for authorization from the Candidate list and annex XIV and additionally restricted substances in annex XVII.

The full legal text of REACH is enclosed in the link below that include the current text of annex XIV and XVII, see link below,

Stockholm Convention on Persistent Organic Pollutants (POPs)

Stockholm Convention on Persistent Organic Pollutants (<http://chm.pops.int>) is an international environmental treaty, signed in 2001 and effective from May 2004, that aims to eliminate or restrict the production and use of persistent organic pollutants (POPs), addressed as the Stockholm Convention. In EU /EEA this international treaty is regulated in Regulation (EC) 850/2004:

http://eur-lex.europa.eu/search.html?textScope=ti-te&qid=1512210279975&DTS_DOM=EU_LAW&type=advanced&lang=en&andText0=Persistent%20Organic%20pollutants&SUBDOM_INIT=LEGISLATION&DTS_SUBDOM=LEGISLATION

Biocidal Product Regulation

The Biocidal Product Regulation (BPR, Regulation (EU) 528/2012, <http://echa.europa.eu/regulations/biocidal-products-regulation/legislation>) concerns the placing on the market and use of biocidal products, which are used to protect humans, animals, materials or articles against harmful organisms, like pests or bacteria, by the action of the active substances contained in the biocidal product.

The Biocidal Products Regulation (BPR) also sets rules for the use of articles treated with, or intentionally incorporating, one or more biocidal products.

Varner has a ban for biocidal products. These substances cannot be used in our production.

Directive on Packaging and Packaging Waste 94/62/EC,

<http://ec.europa.eu/environment/waste/packaging/legis.htm> concerns the management of packaging and packaging waste. The directive includes demands on weight and volume of packaging, content of hazardous substances and materials in the packaging material and its components and the design of reusable or recoverable packaging.

Instruction for the 3rd party laboratory

All test reports must be uploaded and sent through the Interlink system. No manual TRF will be accepted.

In the test report, always present the actual result of the analysis. State your specific limit of detection substance by substance. Please note that the reporting format should be < x mg/kg or for PFAS <x µg/m². If nothing detected, note the detection limit of the instrument (i.e. < x mg/kg, not n/d).

Descriptions & Explanations

Definitions

CAS No	For every substance, the list states the identification number (CAS No) according to Chemical Abstract Services.
++	The ++ sign shows that names and CAS number for each substance in this group are specified in Table 1-15.
Various	Is stated instead of CAS number, the substance has several substances and CAS numbers covered by the specification.
Limit of Detection (LOD)	Is defined as the lowest possible value that can be found during testing with a specific test method
Limit of Quantification (LOQ)	Limit of quantification (LOQ). The smallest concentration of an analyte that can be reliably measured by an analytical procedure
Not Detected	Substance stated with "Not Detected" as a requirement cannot be found above the Detection Limit.

Banned	When a substance is defined as “Banned” this means that the substance cannot be used in production. Those substances cannot be present in the product over the Detection Limit.
Required Limit value	Limit values are based on the highest allowed content of the substance per kilogram article or part thereof.

Relationship between units used by laboratories

1000	mg/kg	equals	1000	ppm	(parts per million
			1 000 000	ppb	(parts per billion
			1 000 000	µg/kg	(microgram per kilogram)
			0,1	% (by weight)	
			x	µg/m ²	x depends on the thickness of the fabric (kg/m ²)
			x	µg/cm ² /week	x is a measure of the release of a substance from a surface and is only partially dependent on the concentration of the substance.

Relationship between surface concentration and total concentration (relevant for PFAS restrictions for example)

Substance [µg/m ²]	Surface weight [g/m ²]		Substance [ppb =µg/kg]
1	40	equals	25
2.5	100	equals	25
5	200	equals	25
Substance [ppb = µg/kg]	Surface weight [g/m ²]		Substance [µg/m ²]
25	40	equals	1
25	100	equals	2.5
25	300	equals	7.5

Extensive List of Restricted Substances

The symbols below give an indication in which type of material the respective chemical is most likely used/ or present.

	Textile	Textile material, both natural and synthetic fibres
	Leather	Leather, both natural and leather imitation
	Trims	Metal, plastics etc. used in e.g. buckles, buttons and zippers. Rubber and glue.
	Packaging	Packaging material in accordance with the Packaging Directive 94/62/EC. Paper, cardboard, plastic bags, tags, labels, plastic sleeves etc.
	Jewelry	Earrings and other body piercing items Necklaces, bracelets, chains, anklets, and finger/toe rings Brooches and cufflinks Wristwatches and wristwear, watch straps and tighteners Metal and/or embellished hair accessories (bobby pins, crowns/diadems, hair pin/clip, hair combs etc) Glass bead, metal beads, metal components and parts of jewellery and imitation jewellery articles

ALKYLPHENOL ETHOXYLATES (APEO) and derivatives

Nonylphenol Ethoxylates (NPEO)	Various	Total content should not exceed 100 mg/kg	ISO 18254-1 (textile), APEO
Octylphenol Ethoxylates (OPEO)	Various		
Nonylphenol (NP)	Various	Not detected during testing.	EN ISO 21084 (textile), AP
Octylphenol (OP)	Various		Leather: ISO 18218-1 LOQ: 10mg/kg

Legal background: Legal limit: 0.1% by weight for nonylphenol ethoxylate (NPEO) as a substance or constituent of preparations (closed systems exempted), entry 46. NPEOs shall not be placed on the market in textile articles, in concentrations equal to or greater than 0.01% by weight of that textile article or of each part of the textile article. Annex XVII of Regulation (EC) No 1907/2006 (REACH), entry 46a. Norway restricts manufacture, import, export, sale and use of octylphenol and octylphenol ethoxylates, and mixtures containing these substances, FOR 2004-06-01-922. 4-Nonylphenol, branched and linear (4-NP, various CAS RN), 4-Nonylphenol, branched and linear, ethoxylated (4-NPnEO, various CAS RN), 4-(1,1,3,3-tetramethylbutyl)phenol (4-tert-OP, CAS RN 140-66-9), 4-(1,1,3,3-tetramethylbutyl)phenol, ethoxylated (4-tert-OPnEO, UVCB substance, no CAS RN), 4-tert-butylphenol (CAS RN 98-54-4) and tris(4-nonylphenyl, branched and linear) phosphite (TNPP) with = 0.1% w/w of 4-nonylphenol, branched and linear (4-NP) (no CAS RN) are listed on the Candidate List of Substances of Very High Concern for authorization of the Regulation (EC) No 1907/2006 (REACH). 4-NPnEO and 4-tert-OPnEO are also included in Annex XIV to REACH.

BIOCIDES

Biocides ¹	++	Banned, Not detected during testing	Solvent Extraction followed by GC-MS

PHTHALATES ESTHERS

Phthalates ¹⁹	++	Banned	EN ISO 14389 analysis with GC-MS or LC-MS LOQ: 100 mg/kg
---------------------------------	----	--------	---

Legal Background: Annex XVII of Regulation (EC) No 1907/2006 of the European Parliament and of the Council (REACH) addresses the following legal limits: 0.1% by weight of the plasticized material in toys and childcare articles for the sum of DEHP, DBP and BBP, entry 51. 0.1% by weight of the plasticized material in all articles for the sum of DEHP, DBP, BBP and DIBP. 0.1% by weight in toys and childcare articles which can be placed in the mouth for DEHP, DBP, BBP, DINP, DIDP and DNOP, entry 52. DIHP, DMEP, DIPP, DPP and DnHP have a restriction limit of 1000 mg/kg in clothing, related accessories, textiles other than clothing in skin contact, or footwear (CMR fast track) according to Annex XVII of Regulation (EC) No 1907/2006 (REACH), entry 72. This limit applies to each substance individually or in combination with other phthalates that are classified as CMR substances. The CMR fast track restriction does not apply to clothing, related accessories, textiles other than clothing, or footwear within the scope of Regulation (EU) 2016/425 (PPE). DEHP, DBP, BBP and DIBP, DIHP, DHNUP, DMEP, 1,2-Benzenedicarboxylic acid, dipentylester, branched and linear, DIPP, N-pentyl-isopentylphthalate and DPP are listed in both annex XIV and in the Candidate List of Substances of Very High Concern for authorization of Regulation (EC) No 1907/2006 (REACH). Dihexyl phthalate, 1,2-Benzenedicarboxylic acid, dihexyl ester, branched and linear, 1,2-benzenedicarboxylic acid, di-C6-10-alkyl esters with ≥ 0.3% of dihexyl phthalate (84-75-3): 68515-51-5 1,2-benzenedicarboxylic acid, mixed decyl and hexyl and octyl diesters with ≥ 0.3% of dihexyl phthalate (84-75-3): 68648-93-1, DCHP and Diisohexyl phthalate are listed in the Candidate List of Substances of Very High Concern for authorisation of the Regulation (EC) No 1907/2006 (REACH). All phthalates in toys and childcare articles for children aged 0-3 years are restricted (0.05%) in Denmark (BEK nr 855).

POLYCYCLIC AROMATIC HYDROCARBONS (PAH)

PAH ²⁰	++	<0,5 mg/kg for each PAH.	<1 mg/kg for each PAH.	ISO 21461 (NMR) AfPS GS 2019-01 PAK ISO/TS 16190 (footwear) EN 17132 (textile) LOQ:0,2mg/kg
--------------------------	----	--------------------------	------------------------	---

Legal background: Materials in toys or childcare articles that come into direct contact with the human skin shall not include any of the listed PAHs in amounts more than 0.5 mg/kg. For rubber or plastic materials with skin contact in other product categories the limit value is 1 mg/kg. Eight PAHs (marked with a star above) are listed in annex XVII, entry 50 of the Regulation (EC) No 1907/2006 (REACH) from 27 December 2015. The voluntary German GS standard has requirements for the sum of 15 PAH (the 16 U.S. EPA listed compounds) and also specifically benzo [a] pyrene, that most products in the German market follows. Benzo(a)anthracene, (56-55-3), Chrysene, (218-01-9), Benzo(a)pyrene, (50-32-8), Anthracene (120-12-7), anthracene oil distillation fractions, Benzo[ghi]perylene (191-24-2) Benzo[k] fluoranthene (207-08-9), Fluoranthene (206-44-0), Phenanthrene (85-01-8) and Pyrene (129-00-0) are included in the Candidate list of Substances of Very High Concern (SVHC) for the authorization of the Regulation (EC) No 1907/2006 (REACH).

The following PAHs have a restriction limit of 1 mg/kg in clothing, related accessories, textiles other than clothing in skin contact, or footwear (CMR fast track) according to Annex XVII, entry 72, of Regulation (EC) No 1907/2006 (REACH):

Benzo(a)anthracene, 56-55-3

Benzo(a)phenanthrene (chrysene), 218-01-9

Benzo(a)pyrene, 50-32-8

Benzo(b)fluoranthene (benzofluoranthene) 205-99-2
